

Society Chat OF THE Week

Mrs. S. G. O. King Now Visiting in Honolulu.

Mrs. S. G. O. King, whose picture appears in this issue, was formerly Miss Maria Cummings of this city. Mrs. King has been away from Honolulu for fifteen years and is now here on a visit. At the present time she is the house guest of the Princess Kalaianuole. During her stay here Mrs. King has been guest of honor at many dinners, luncheons and teas, and her friends and relatives here, have planned many more such affairs for her.

Rosa Bonheur Exhibition at Kilohana Art League.

The Honolulu public had the opportunity of viewing yesterday the pictures by Rosa Bonheur and Miss Anna Klumpke at the Kilohana Art League. This was perhaps the last view of the pictures opened to the public, for Miss Klumpke leaves for the Volcano today, and on the first of October will leave for California. Yesterday's affair was enjoyed by the hundred or more people who called at the rooms of the Art League. So far some of these paintings have been purchased by the residents of Honolulu who for the most part are picture loving. It would be a splendid thing say some people if one of these paintings either by Rosa Bonheur, or the portrait of her, by Miss Klumpke, were purchased and put in some public building. All of Miss Klumpke's pictures that have been on exhibition here have excited a good deal of comment on the part of the artists who have viewed them. It is said that Miss Klumpke is the greatest artist who has visited Honolulu, and also that many of the people will realize this fact after she has left Honolulu.

Mrs. Eric Knudsen's House Party.
Mrs. Eric Knudsen was hostess at a most delightful house party the last fortnight at her home on Kaula. After a pleasing program, rendered by Mrs. John Erdman, who sang a solo; Miss Erickson, who gave a short talk on the work of the Y. W. C. A., and by Mr. William Love, who played a violin solo, refreshments were served by a number of

PLUSH HATS

Hatters' plush is expected to be used on many of the new fall hats, and beaver cloth will doubtless be seen on the tailored hat, says the Pittsburg Sun. This cloth will probably be popular with the business woman, as it wears so well, and a hat of beaver looks trim and neat to wear with a tailored suit. Dresden taffeta will be much used for trimmings—especially in the way of large bows.

SHOULDER SEAMS

If the shoulder seams are always turned toward the front when sewing them—that is, if they are not to be

pressed open—it will prevent the back from having the puckered look, caused by the tight edge of the seams, the edge being narrower than the back.—Needlecraft.

IS "FIREPROOF" A MISNOMER?

Many people think that the term "fireproof" is a misnomer, that there is no such thing as a "fireproof" building and that the use of the term gives one too great a sense of security. This attitude has been brought about largely by the destruction or serious damage of certain buildings that were supposed to have been fireproof and by the fact that many people think because a building is fireproof it should in some occult fashion prevent the contents from burning. It is a matter of record that where buildings called fireproof have been destroyed they have been found to have violated some fundamental principle of the really fireproof building. A fireproof building must be considered apart from its contents, for the structure itself can in no way prevent the burning of combustible material within it, except in so far as it may be designed to prevent the spread of fire. It is true that we have not yet attained the absolutely fireproof building, since even the best fireproofing material we have today is somewhat damageable by fire, but we can and do erect structures that are practically fireproof.

The term "fireproof" in building construction means a capability of withstanding fire without being materially damaged. A fireproof building, therefore, may be defined as one that is capable of having its contents cremated without material impairment structurally. That is, all burnable material may be destroyed, but the structure itself will remain intact, requiring only the replacement of some of the fireproofing and the interior finish to make it again ready for occupancy.—F. P. Walther in Engineering Magazine.
